Students must complete all General Education requirements and all Major requirements. Any acceptable General Education course which is also required in the major may apply to (double-count in) both required areas. Courses common to the areas of World Cultures, Arts and Humanities, and Social and Historical Studies may also double count. However, credit for such courses counts only once toward the total required credits for a degree.

Dietetics

About the Major: A Vital Growing Profession

Dietetics is about the science and art of applying the principles of nutrition and food preparation to health. Dietitians work in medical and food service settings with

- infants and young children
- school aged children
- athletes
- adults
- senior citizens

Job growth is expected to increase in the next decade because of an increased emphasis on disease prevention and healthy lifestyles.

Opportunities in the Program

Dietetics majors can minor in psychology or fitness. They can join our run IU Student Academy of Nutrition and Dietetics [https://beinvolved.indiana.edu/organization/SANDatIndiana](https://beinvolved.indiana.edu/organization/SANDatIndiana), which features numerous volunteering opportunities. The Dietetics program has a nutrition lab and a foods lab. Classroom activities include community projects, planning and preparing a special event meal for students in the halls of residence, designing a research project, and learning in-depth about special issues in nutrition.

What You Can Do

Dietitians promote healthy eating habits so that people can prevent or treat illnesses. IU dietetics graduates go on to complete a supervised practice experience (internship) and are then eligible to take a national exam to become a Registered Dietitian (RD). RDs are the recognized nutrition health care professionals. They

- counsel patients
- do research and develop food products
- oversee large-scale meal planning and preparation
- work in nutrition communication or marketing
- develop nutrition programs

Where You Can Go

RDs work in

- clinical settings such as hospitals
- extended care facilities
- government agencies
- private practice
- corporate wellness programs
- food service operations

What You Will Earn

In 2010, the median salary for a Registered Dietitian was $53,250. Clinical dietitians start at about $35k-$45k and food service dietitians start at about $42k-$50k.
