GENERAL EDUCATION 20-39
MAJOR 84-93
COMPLETE A MINIMUM OF 124 CREDITS FOR THIS DEGREE.

Visit the Kinesiology website at www.indiana.edu/~kines

* Generally fall only ** Generally spring only
The suggested plan below shows how you may sequence courses to allow for completion of the degree in a four-year period. There is usually some flexibility within this plan as long as free elective course credit hours are not exceeded. Free electives are limited to between 17 and 25 credit hours. Preprofessional students should see their advisor about the use of free electives. Most electives will be additional science courses. Students should meet with an advisor at least once each semester to plan their curriculum.

Exercise Science

Description of Program

The major in exercise science has a science-based curriculum that provides a broad background for students planning to further their education at the graduate level. The program emphasizes these primary disciplines: anatomy, biomechanics, exercise physiology, sport psychology, and motor learning/control. Students complete a rigorous curriculum in major course work as well as in areas such as anatomy, chemistry, mathematics, physics, physiology, and psychology. The major provides an excellent preparation for graduate work in adapted physical education, ergonomics, biomechanics, exercise physiology, motor control, sport psychology, and sports medicine. In addition, students with this major prepare for admission to graduate programs in physical and occupational therapy, medicine, physician assistant, dentistry, podiatry, optometry, chiropractic, osteopathy, and other allied health fields.

Special Opportunities

Majors have the opportunity to work with faculty research specialists in areas specific to kinesiology. Students planning to pursue graduate kinesiology programs are encouraged to gain laboratory research experience offered by departmental faculty. Internship opportunities outside of the department in a wide variety of medical and allied health areas are coordinated by the Kinesiology Career office. Throughout the year, the very active Kinesiology Club invites speakers from a number of health profession areas to share their expertise and professional perspective with majors. Through these experiences, students learn firsthand about the graduate programs/professions of interest to them. Expert and in-depth advising services help students tailor their major program to meet their eventual goals.

Careers

Many students with this major are preparing to enter graduate programs in their career area of interest, most often a health profession, such as: physical therapist, occupational therapist, physician’s assistant, medical doctor, dentist, optometrist, or other allied health profession. Other students go on to pursue graduate degrees in exercise physiology, biomechanics, motor learning and control, and ergonomics. Others may seek positions in fitness instruction, personal training, coaching, cardiac rehabilitation, health screening and education, pharmaceutical sales, or sales and marketing of medical, fitness, or sports-related equipment. This major can be combined with a minor or professional certification to tailor the student’s background to a specific area, such as health care, coaching, fitness, or business.
