General Education (20 – 39 credits)
(General Education Bulletin at: www.indiana.edu/~bulletin/iub)

English Composition (0 to 3 credits, C minimum required)
Complete one of the following options:
--- 3 CMLT-C 110 Writing the World
--- 3 ENG-W 131 Elementary Composition
--- 3 ENG-W 170 Projects in Reading and Writing
--- 0 ENG-W 131 EX Elementary Composition Exemption

Mathematical Modeling (3 to 4 credits)
Complete one of the following options:
--- 4 MATH-D 116 AND MATH-D 117 Intro to Finite Mathematics I-II
--- 3 MATH-J 113 Introduction to Calculus with Applications
--- 3 MATH-M 106 The Mathematics of Decision & Beauty
--- 3 MATH-M or V or S 118 Finite Mathematics
--- 3 MATH-M or V 119 Brief Survey of Calculus I
--- 4 MATH-M 211 Calculus I
--- 4 MATH-M 213 Accelerated Calculus

Natural and Mathematical Sciences (5 credits)
Complete 5 credits from the list of approved N&M courses in the IUB General Education Bulletin. At least one course must be a natural science (as indicated by an asterisk in the GENED bulletin).
---

Arts and Humanities (6 credits)
Complete 6 credits from the list of approved A&H courses in the IUB General Education Bulletin.
---

Social and Historical Studies (6 credits)
Complete 6 credits from the list of approved S&H courses in the IUB General Education Bulletin.
---

World Languages and Cultures (0 to 14 credits)
Choose one of the following three options:
Complete 6 credits of world culture courses from the list of approved WC courses in the IUB General Education Bulletin.

OR
Achieve competency in a single foreign language equal to successful completion of the four semester sequence in a world language.

OR
Complete a 6-credit International experience in an approved study abroad. A list of approved course choices may be found in the IUB General Education Bulletin.
---

Major (78-86 credits)

Foundational Anatomy/Physiology (3-10 credits)
Students must acquire at least 3 credits in Anatomy AND Physiology:

This requirement may be completed by taking the following course:
--- 3 MSCI-M 115 Intro to Anatomy & Physiology

Alternatively, students may complete this requirement by completing the following individual Anatomy and Physiology courses:
--- 5 ANAT-A 215 Basic Human Anatomy N&M
--- 5 PHSL-P 215 Physiology N&M

Public Health Core (15 credits, C- min req each course)
Complete each of the following courses:
--- 3 SPH-B 366 Community Health
--- 3 SPH-E 311 Introduction to Epidemiology
--- 3 SPH-P 309 Public Health Administration
--- 3 SPH-Q (or H) 381 Intro to Biostatistics
--- 3 SPH-V 241, Found. of Environmental Health N&M

Environmental Health Courses (23 cr., C- min each crse)
Complete each of the following courses:
--- 3 SPH-V 201 Introduction to Occupational Safety and Health **
--- 3 SPH-V 214 Environmental Regulations and Code Compliance **
--- 3 SPH-V 215 Food Safety and Sanitation *
--- 3 SPH-V 341 Environmental Health Management *(P: V214, V241)
--- 3 SPH-V 442 Introductory Toxicology ** *(P: V241, anatomy & Physiology; BIOL-L 112, L113, and L211 or SPH-V 235; CHEM-C 117/C127)
--- 3 SPH-V 443 Environmental Sampling and Analysis *
   (P: BIOL-L 112, L113, and L211 or SPH-V 235; CHEM-C 117/C127, physics)
--- 5 SPH-V 496 Field Experience in Public Health *(P: completion of all Public Health Core and Environmental Health courses, and departmental permission)
   (Contact intern coordinator early in semester prior to internship semester)

Foundational Chemistry (5 cr.)
Complete each of the following courses:
--- 3 CHEM-C 117 Principles of Chemistry and Biochemistry I N&M
--- 2 CHEM-C 127 Principles of Chemistry and Biochemistry Lab N&M

Foundational Science (17-18 credits)
Complete each of the following courses:
--- 4 BIOL-L 112 Foundations of Biology: Biologic Mechanisms N&M
--- 3 BIOL-L 113 Biology Laboratory
--- 4-5 PHYS-P 201 General Physics I (5 cr.) N&M
   ---or--- PHYS-P 101 Physics in the Modern World (4 cr.) N&M
--- 3 PSY-P 101 Introductory Psychology I N&M
--- 3 SPH-V 235, Intro to Public Health Biology
   ---or--- BIOL-L 211 Molecular Biology
Professional Electives (15 credits)
Complete a minimum of 15 credits from one of the following lists:

**List A:**
- 3 BIOL-L 307 Biodiversity (P: L111/ L112; or permission of instructor)
- 3 BIOL-L 328 Disease Ecology & Evolution (P: L211)
- 3 BIOL-L 412 Analysis of Cancer Research (P: L113 & L211)
- 3 BIOL-L 472 Microbial Ecology (P: junior standing in biology)
- 3 BIOL-L 473 Ecology (P: L111; R: L318)
- 4 BIOL-M 375 Human Parasitology IP: L111, L112)
- 3 BIOL-M 380 Microbiology of Infectious Disease (P: L 211)
- 3 BIOL-Z 373 Entomology (P: one introductory biology course)
- 3 BIOL-Z 476 Biology of Fishes (P: L111, L112, L113)
- 3 GEOG-G 208 Environment & Society N&M
- 3 GEOG-G 338 Geographic Information Science
- 3 GEOG-G 341 Ecological Restoration: Science & Politics (P: G208 or junior standing))
- 3 GEOG-G 343 Perspectives on Environmental Decisions (P: G208 or junior standing)
- 3 GEOG-G 347 Water Security & Sustainability
- 3 GEOG-G 369 The Geography of Food
- 3 GEOG G 444 Climate Change Impacts (P: G109 or G304, or permission of instructor)
- 3 GEOG-G 445 Food, Place, & War
- 3 GEOG-G 451 Physical Hydrology (P: G107 or G109 and one 300-level physical/biological science course, or consent of instructor)
- 3 GEOG-G 453 Water & Society
- 3 GEOG-G 461 Human Dimensions of Global Environmental Change (P: G208 or consent of instructor)
- 3 GEOG-G 469 Food & Global Poverty (P: junior standing or consent of instructor)
- 3 GEOG-G 478 Global Change, Food, and Farming Systems (P: G208 or consent of instructor)
- 3 INTL-I 222, Global Health Connections
- 3 INTL-I 420 Global Sustainability Studies
- 3 INTL-I 429 Global Health Politics
- 3 SPEA-E 260 Intro to Water Resources (P: SPEA-E 272 and any biology class)
- 3 SPEA-E 311 Intro to Risk Assessment/Risk Communication
- 3 SPEA-E 316 Insects & the Environment
- 3 SPEA-E 324 Controversies in Environmental Health
- 3 SPEA-E 412 Risk Communication
- 3 SPEA-E 418 Vector-Based Geographic Information Systems
- 3 SPEA-E 431 Water Supply & Wastewater Treatment ** (odd years)
- 3 SPEA-E 451 Air Pollution & Control * (even years)
- 3 SPEA-E 452 Solid and Hazardous Waste Management *
- 3 SPEA-E 460 Fisheries & Wildlife Management
- 3 SPEA-E 466 International & Comparative Environmental Policy
- 3 SPEA-V 275 Introduction to Emergency Management
- 3 SPEA-V 412 Leadership & Ethics
- 3 SPH-O 343 Sustainable Agriculture
- 3 SPH-V 360 Environmental Justice
- 3 SPH-V 422 Issues in Global Environmental Health

**List B:**
- 3 CHEM-C/S341, Organic Chemistry Lectures I (P: C/S 117)
- 3 CHEM-C/S 342 Organic Chemistry Lectures II (P:C/S 341)
- 3 CHEM-C/S 343 Organic Chemistry Lab I (R: C/S 342)
- 3 CHEM-C 383, Chemical Organization of Living Systems (P: C/S 341 or R340)
- 3 CHEM-C 483, Biological Chemistry (P: C/S 342 or R340)
- 5 CHEM-N 330, Intermediate Inorganic Chemistry (P: C/S 342 or R340; C/S 343)
- 5 PHYS-P 202, General Physics II (P: P201)

* Generally fall only  ** Generally spring only

120 credits are required for graduation.

General Education  20-39
Major  78-86

What is Environmental Health?
Environmental Health (EH) is a branch of public health protection that is concerned with all aspects of the natural and built environment that may affect human health.

EH professionals are best known for their efforts to ensure the safety of what we eat, breathe, touch, and drink, by:

- monitoring air quality, water and noise pollution, toxic substances and pesticides.
- conducting restaurant inspections.
- promoting healthy land use and housing.
- working in vector control to limit or eradicate the agents which transmit disease pathogens.
- doing research on topics such as environmental toxins, communicable disease outbreaks, and human health impacts of environmental catastrophes (such as hurricanes).

Why an environmental health career?
Jobs: According to the Bureau of Labor Statistics employment of environmental scientists and specialists is expected to increase by 28 percent between 2008 and 2018, much faster than the average for all occupations. Job growth should be strongest in private-sector (non-governmental) and consulting firms.

Much job growth will result from a continued need to monitor the quality of the environment, to interpret the impact of human actions on terrestrial and aquatic ecosystems, and to develop strategies for restoring ecosystems. In addition, environmental scientists will be needed to help planners develop and construct buildings, transportation corridors, and utilities that protect water resources and reflect efficient and beneficial land use.

Increased Environmental Health Threats: The number of environmental health threats continues to grow. Tainted food outbreaks such as E-coli and salmonella, bed bug infestations, devastating events like September 11th, Hurricane Katrina and more, call for an increase in the number of people trained to address these issues. We need more people to choose a career in environmental health to protect human health and the environment.

Competencies developed through study in this major
http://www.publichealth.indiana.edu/degrees/competencies/bsph-competencies.shtml

Can you see yourself doing any of these activities?

- Protecting the environment
- Protecting community health
- Explaining to people how the environment affects public health
- Conducting research
- Testing water or air quality
- Doing restaurant health inspections
- Writing scientific reports

What kinds of jobs are out there?

- Environmental scientist
• Air or water quality specialist
• Solid waste specialist
• Industrial hygienist
• Emergency response
• Environmental epidemiologist
• Compliance inspector
• Food safety manager
• Private consulting

What sorts of responsibilities might the work involve?
• Collecting & interpreting data
• Investigating complaints
• Reviewing permits, renewing or revoking licenses
• Monitoring, performing inspections
• Education

Where you could work:
• Public Health departments
• Nonprofit organizations addressing environmental health
• Government agencies such as the U.S. Environmental Protection Agency (EPA), the Centers for Disease Control and Prevention (CDC), the U.S. Public Health Service
• Private companies looking for environmental health specialists
• Environmental research corporations
• State environmental health associations

Average starting salary range: $29,000-$50,000

How can I tell if this is the right program for me?
Environmental Health may be the major for you if:
• You like science and may or may not want to work in a lab.
• You’d rather be in the field.
• You care about the health of people in your community.
• You work well both in team settings and on your own.
• You are good at seeing “the big picture,” and are also detailed-oriented.
• You want to choose a growing field with plentiful job opportunities.
• You want the option of further education (MPH, MS, PhD).
